

Description

Adis Reactions Database provides comprehensive news and current information on adverse drug reactions. The database is the online equivalent of the *Reactions*TM newsletter and provides comprehensive coverage and analysis of all clinically relevant adverse drug events, as well as explores and interprets trends identified from thousands of biomedical journals published worldwide.

Journals screened include leading worldwide general medical journals, medical specialty journals, special interest journals and periodicals in the fields of basic biomedical sciences, drug research, pharmacology, clinical pharmacy, and medical therapeutics. Over 80 Japanese journals devoted to pharmacology and medical therapeutics are monitored and translated.

All reports follow CIOMS II Data Guidelines and FDA requirement definitions.

To ensure comprehensive coverage, reports are routinely translated into English from various languages, including German, French, Italian, Spanish and Japanese.

This database copyrighted by Adis Data Information BV. Data may not be duplicated in hard copy or machine-readable format without written permission of Adis Data Information BV.

Subject Coverage

Coverage of more than 2,000 major international medical and biomedical journals can be found in the database. Areas covered by Adis Reactions Database include:

- Views and Reviews providing insight into current issues and trends in adverse drug use experience
- Adverse Drug Reactions(ADR) providing comprehensive reporting of all adverse reaction case reports and incidence studies identified in international biomedical literature
- Drug Interactions identifying reports of clinical experience in individual patients and evaluations of their clinical significance
- Overdose with particular emphasis on the clinical management strategies used as well as their effectiveness
- Abuse and Dependency containing all cases of abuse and dependency that appear in the literature alerting searchers to potential problems and possible solutions

Notes:

Field codes may be used in searches entered on the Basic Search, Advanced Search and Command Line Search pages. The tools available for searching are [Search Fields](#), [Limit Options](#), [Browse Fields](#), ["Narrow Results By" Limiters](#) and [Look Up Citation](#). Each is listed separately below. Some data can be searched using more than one tool.

SEARCH FIELDS

Field Name	Field Code	Example	Selectable from Advanced Search form Drop-down menu	Available as Limit Option	Available Look up / Browse	Displayed in Document View	Description and Notes
Accession number	AN	an(800967499)	No	No	No	Yes	A unique document identification number assigned by the information provider.
All fields	ALL	all(diabetes) all("cardiac arrest") all(diabetes near/4 insulin)	Yes	No	No	Yes	Use Adjacency and/or Boolean operators to narrow search results.
Cited references	REF	ref("american journal of gastroenterology. 10 aug 2010") ref(japanese)	Yes	No	No	Yes	Displays in References field. Includes Cited Authors, Source Information, original language, brief abstract.
Descriptors	DE	de(diabetes) de("drug interaction*")	No	No	No	Yes	Also searchable using SU.
Document text	TX	tx(diabetes) tx("cardiac arrest") tx(diabetes near/4 insulin) tx(medical* and coma)	Yes	No	No	Yes	Use Adjacency and/or Boolean operators to narrow search results.
Document title	TI	ti(migraine*) ti(migraine* and "case report")	Yes	No	No	Yes	Use Adjacency and/or Boolean operators to narrow results. May include Alternate or Subtitles.
Document type	DTYPE	dtype(article)	No	No	No	Yes	
Language	LA	la(english)	No	No	No	Yes	For language of original document use REF. All text is translated to English.
Last update date	LUPD	lupd(20111025) lupd(20110101-20110531) lupd(>20110101)	No	Yes	No	Yes	
Publication date	PD	pd(20110728) pd(2010-01-15) pd(20100601-20101231)	No	Yes	No	Yes	
Publication title	PUB	pub(adis reactions)	Yes	No	Yes	Yes	
Publication year	YR	yr(2007) yr(2009-2010) yr(2009:2010)	No	No	No	Yes	

Field Name	Field Code	Example	Selectable from Advanced Search form Drop-down menu	Available as Limit Option	Available Look up / Browse	Displayed in Document View	Description and Notes
Source information	SRC	src("adis reactions")	No	No	No	Yes	
Subject	SU	su(diabetes) su("drug interaction*")	Yes	No	Yes	Yes	Includes Descriptors
Title (document)	TI	ti(migraine*) ti(migraine* and "case report")	Yes	No	No	Yes	Use Adjacency and/or Boolean operators to narrow results. May include Alternate or Subtitles.
Document text	TX	tx(diabetes) tx("cardiac arrest") tx(diabetes near/4 insulin) tx(medical* and coma)	Yes	No	No	Yes	Use Adjacency and/or Boolean operators to narrow search results.

LIMIT OPTIONS

Limit options are quick and easy ways of searching certain common concepts.

Date limiters are available in which you can select single dates or ranges for **date of publication**.

BROWSE FIELDS

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down on the Advanced Search Page for:

Publication title and **Subjects**

“NARROW RESULTS BY” LIMITERS

When results of a search are presented, the results display is accompanied by a list of “Narrow results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on term(s) to include or exclude and apply them to (“narrow”) your search results. Narrow results by limiters in Adis Reactions Database include:

Publication title, Document type, Subject and **Publication date**

LOOK UP CITATION

If you need to trace a particular bibliographic reference, use the Look Up Citation feature. Find a link to this toward the top left of the Advanced Search page, or in the drop list under Advanced on any search form; click this and you will go to a form where you can enter any known details of the citation, including: Document title, Author, Publication title, ISSN, ISBN, Volume, Issue, Page, Publication date, DOI.
