

Description

The Incidence and Prevalence Database provides disease- and epidemiology-related information, statistics and sources for various regions of the world. Topics covered are: incidence, prevalence, morbidity, mortality, trends, cost, risk factors, and disease classifications. Hospitals, emergency rooms, physicians' office activity, and inpatient/outpatient surgical procedures are covered, and users can monitor these statistics to forecast market size, potential, and trends.

IPD monitors and abstracts epidemiology type data from over 3,000 scientific, medical and business journals. It compiles and consolidates information for both diseases and surgical procedures from trade journals, medical journals, market investment reports, on-line databases, audits, industry contacts, medical and scientific associations and national and international health care surveys.

Subject Coverage

Each ICD code has an associated Statistical Information record. This record includes Notes, Suggested Reading, U.S. Trend Data, and Global Incidence and Prevalence. The Notes section includes definitions, cross-references, and other information specific to a disease or procedure. The Suggested Reading section provides a list of article sources covering areas such as treatment, etiology, quality of life/cost-effectiveness, genetics, diagnosis, and histopathology. The U.S. Trend Data section shows trends over time for hospital inpatients, hospital outpatients, physicians' office visits, and emergency department visits (where applicable). The Global Incidence and Prevalence section summarizes the U.S. and international incidence and prevalence data appearing in our Article Review text (sources are attached at the end of each paragraph).

Most ICD codes have a number of associated Article Reviews (the number of related reviews can range from one to over one hundred, depending on the topic). The Article Review text sections bring you the latest medical research findings to complement the incidence and prevalence data, including morbidity, mortality, natural history, concomitant diseases, cost issues, and other vital clinical and demographic information.

Date Coverage

1994 – Present

Notes:

Field codes may be used in searches entered on the Basic Search, Advanced Search and Command Line Search pages. The tools available for searching are [Search Fields](#), [Limit Options](#), [Browse Fields](#) and ["Narrow Results By" Limiters](#). Each is listed separately below. Some data can be searched using more than one tool.

SEARCH FIELDS

Field Name	Field Code	Example	Selectable from Advanced Search form drop-down menu	Available as Limit Option	Available Look up / Browse	Displayed in Document View	Description and Notes
Accession number	AN	an(06552)	No	No	No	Yes	A unique document identification number assigned by the information provider, Timely Data Resources.
All fields	ALL	all(caucasian)	Yes	No	No	Yes	Searches all fields except Document text (TX).
Cited reference	REF	ref("british journal of dermatology" and "2010")	Yes	No	No	Yes	
Classification	CC	cc(416.0) cc("pulmonary artery hypertension")	Yes	No	No	Yes	
Date revised	DREV	drev(2010-05-04) drev(20100504)	No	No	No	Yes	Date on which the information provider edited the document.
Document text	TX	tx(comorbidity)	Yes	Yes	No	Yes	Includes Section Headings named Statistics and Trends, Text and Notes.
Document title	TI	ti(diabetes and child*)	Yes	No	No	Yes	
Document type	DTYPE	dtype(article)	No	No	No	Yes	The Document type value is article for all records.
Identifiers (keywords)	IF	if("reye's syndrome")	Yes	No	Yes	Yes	
Language	LA	english	No	No	No	Yes	The language is English for all records.
Last update date	LUPD	lupd(20110404) lupd(2011-04-04)	No	Yes	No	Yes	
Publication date	PD	pd(2010)	No	Yes	No	Yes	
Publication year	YR	yr(2010)	No	Yes	No	Yes	
Publisher	PB	pb(tdr and "capitola california")	No	No	No	Yes	The publisher for all records is TDR (Timely Data Resources).
Subject	SU	su("reye's syndrome")	No	No	No	Yes	Contains the identifiers in IF. Limit option and Look Up list available under IF.

LIMIT OPTIONS

Limit options are quick and easy ways of searching certain common concepts.

Date limiters are available in which you can select single dates or ranges for date of **publication**.

BROWSE FIELDS

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down for:

Identifier

“NARROW RESULTS BY” LIMITERS

When results of a search are presented, the results display is accompanied by a list of “Narrow results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to (“narrow”) your search results. “Narrow results by” limiters in Incidence & Prevalence include

Classification, Publication date
